

Accelerate Your Organization's Work From Home Capabilities with Amazon WorkSpaces

Many organizations are encouraging employees to work from home during this time of uncertainty to slow the spread of COVID-19. Amazon Workspaces is a simple and cost-effective solution to enable remote workers to be productive at any scale. Amazon Workspaces is a fully managed Desktop-as-a-Service, that allows you to provision and manage Windows and linux-based virtual desktops from the Amazon Web Services (AWS) platform. With Amazon Workspaces you only pay for the workstations you launch (either monthly or hourly), saving money when compared to traditional desktops and on-premises VDI alternatives.

Amazon WorkSpaces Benefits:

Provide Secure Cloud Desktops for Remote Employees

As organizations seek scalable remote desktop solutions in response to COVID-19, Amazon Workspaces help mobile and remote employees access the applications users need by delivering a cloud desktop accessible anywhere with an internet connection using any supported device.

Enable Bring your Own Device

Run a secure cloud desktop directly on a wide range of devices like PC, Mac, iPad, Kindle Fire, Android tablet, Chromebook, and web browsers like Firefox, and Chrome.

Centrally Manage and Scale your Global Desktop Deployment

Amazon WorkSpaces is available in 13 AWS Regions and provides access to high performance cloud. You can manage a global deployment of many thousands of WorkSpaces from the AWS console and rapidly provision and de-provision desktops as the needs of your workforce change.

Keep your Data Secure

Amazon WorkSpaces is deployed within an Amazon Virtual Private Network (VPC), provide each user with access to persistent, encrypted storage volumes in the AWS Cloud. No user data is stored on the local device. This helps improve the security of user data and reduces your overall risk surface area.

How Softchoice Can Help:

It's possible that your company can enable most of your employees to work from home in less than a week without compromising security. Softchoice works with the world's largest companies and public sector agencies to securely enable their workforces to work from anywhere on any device.

We know you need this in days not months.

Softchoice will fund an initial discovery session via video conference to assess the feasibility of remote work, and then provide a roadmap that outlines how your workforce can begin working from home immediately.
