

Softchoice's immediate focus is supporting our clients through the challenges they are experiencing in the activation of their business continuity plans; we are also committed to supporting you and your organization with Softchoice and the vendor solutions you select as part of your business continuity plan.

Amazon Web Services (AWS) is offering Amazon Chime Professional licenses for free, for new Amazon Chime customers with an AWS account for 90 days. This will be an automatic program with the only prerequisites that organizations are not existing customer of the service.

Amazon Chime is a high-quality communications service that transforms online meetings with an easy-to-use app which works seamlessly across all your devices. With Amazon Chime, you can schedule and attend online meetings and video conferences, and chat, call, and collaborate, inside and outside your organization, all with a single app. Now you can work productively from wherever you are.

To ensure that our clients can access this service without providing a credit card – and using the same approved Net 30 terms they enjoy today – Softchoice is able to facilitate AWS account creation and tenant activation. Softchoice will activate a single account (or multi account organization) according to AWS best practices for clients wishing to take advantage of the AWS Chime offer.

Please reach out to us with any questions, otherwise we will be in touch with further updates on the status of our own business continuity plans, as well as the efforts to help our customers with their own.
